Forced to Private
Education

Education is one of the most important tools for the success of a human being. But access to this is often hindered in our modern capitalistic society

The financial situation of most families forces them to rely on educational loan

How Education Loan is Given Today

01

Checks Enrolled
Institute Brand

02

Parents' CIBIL
Score

03

Student's
Academic
Performance
Pre-College

Solution

Revolutionize Banks Assessment Methodology

We are changing the factors taken into consideration while assessing a student and making the decision whether to fund the person or not

Judging Future and not the Past

Our Analysis entails methodologies where the student's soft skills and interpersonal characteristics are taken into consideration to predict his/her probability of repaying

Timely Follow Ups

Our model is a service that we are providing to the bank. We will be having frequent follow-ups and check ups regarding the students' progress in all direction, be it academic excellence, Soft skills, Initiatives and leaderships

Business Model

Business Model

- We are a service-providing company with a goal for social change. Hence we do not aim at charging the loan seekers who are already in financial struggle.
- Instead, we will be providing service to the Banks and financial institutions.
- The customers coming towards banks for loans will be redirected to us for a more humane and overall risk analysis.

Uniqueness

- This is a completely new and never-before-seen initiative. This project aims to revolutionize the existing capitalistic system of financial institutions
